CONNECT YOUR GAME CONSOLE TO THE NET

Connect your Game Console to the Internet and Experience Fast, Online Gaming from Anywhere in the Home

Introducing **GameNet**, the simplest and fastest way to connect your game console to the Internet, from anywhere in the home! The latest in console gaming connectivity solutions from Corinex Communications, **GameNet** creates a secure, faster than Wireless Internet connection for your **XBOX™, XBOX™ 360, Wii™, PS®2 or PS®3**.

Before **GameNet**, most console gamers have been limited in their online play due to poor wireless connections that cause delays or "lag" and complicated, time consuming setups for connecting a game console to the Internet. **GameNet** offers gamers a fast alternative, with no lag! Whether it's sports, Massively Multiplayer Online Role-Playing Games (MMORPG), racing, or other games, GameNet is the solution that gives gamers every edge in online play.

The **GameNet** adapters utilize the existing electrical wiring in the home to create a fast, stable connection to the Internet. **GameNet** can also connect multiple game consoles together for large gaming events.

Play - Stream - Share

Installation of **GameNet** is easy and fast; taking about two minutes. You simply connect one of the two **GameNet** adapters to a broadband modem or computer and plug it into a nearby power outlet. Then simply plug the second adapter into the Ethernet port of the game console in any room in the home, and insert it into a nearby power outlet. The adapters automatically configure themselves to provide users with a secure and fast connection to the Internet. If you move your game console, the adapters can move with it.

- 4x Faster Than Wireless
- 2 Minute Installation
- Guaranteed Stable Connection
- Eliminates LAG !
